

The Simplified Plan

\$1,399 one-time setup • \$499/month • month-to-month, cancel anytime

Found, chosen, and answered.

One plan that runs the whole front of your business — the phone, the website, and Google — built and managed by one team, on one invoice.

1. Your Phone, Answered 24/7

We build and run an AI receptionist on your line with 1,000 minutes and 500 texts a month.

Every call answered, appointments booked into your calendar, summaries after every conversation, and 500 texts for appointment reminders and follow-ups. Extra minutes are a flat \$0.35 each.

2. Your Website, Built and Kept Fresh

We design and build your website from scratch — then host, maintain, and update it.

Unique to you, never a template, with support and revisions included while you're subscribed.

3. Your Google, Working For You

We optimize your Google Business Profile, handle review requests and responses, and publish 4 posts a month.

Customers searching nearby find a business that looks alive, answers fast, and has the reviews to prove it.

4. Optional Add-ons

Two upgrades available on top of the plan, \$150/month each.

Interactive dashboard — analyze your business from your phone, refreshed monthly. Social media campaign postings — campaigns created and posted for you.

5. One Team, One Invoice

One monthly bill, one place to call, one team accountable for all of it.

Want more firepower later — ads, cinematic reels, more locations? Every lane upgrades from here.

What this means for you

You stop juggling vendors. The phone gets answered, the website stays sharp, Google keeps sending customers — and you get one clear monthly report on all of it.
